

## **AWT Labels & Packaging Sustainability Policy**

**AWT Labels & Packaging** is committed to operating in a manner that will prevent impact to our environment. Our sustainability strategy is two-fold:

- Implement and maintain sustainable operating practices in our facilities
- Provide our customers with packaging and labeling material options that are sustainably sourced, manufactured and circular in composition

### **Sustainable Operating Practices**

**It is, and will continue to be the policy of AWT to:**

*Recycle as much waste material as possible*

*Minimize the overall amount of waste generated in all processes*

*Reduce energy usage in our production and office areas*

*Responsibly dispose of equipment that has become obsolete or inoperable*

*Invest in equipment and technology that is more efficient*

*Engage in communication practices that utilize less paper (electronic invoicing; digital production instructions, etc.)*

*Reduce the amount of water used in our production processes*

*Minimize emissions released into the air and water*

*Avoid travel when possible by utilizing digital meeting/conference technology*

*Encourage employees to adopt sustainable practices in their workspaces and at home*

### **Sustainable Product Offerings**

In addition to AWT's efforts to operate in a sustainable manner, we are committed to helping our customers achieve their own sustainability objectives through our packaging and label material selection.

**AWT currently offers, and will continue to develop, the following sustainable material options:**

- Post-consumer recycled (PCR) paper and film face-stock and liners
- Recyclable paper and film
- PET wash-off options to optimize recyclability
- Bio-polymer films and other renewable materials
- Compostable and biodegradable film
- Flexible packaging that is either recyclable or conforms to other sustainability criteria
